**Stem Cells and the Future of Regenerative Medicine** Committee on the Biological and Biomedical Applications of Stem Cell Research, Commission on Life Sciences, Board on Neuroscience and Behavioral Health, Board on Life Sciences, Institute of Medicine, Division on Earth and Life Studies, National Research Council

Recent scientific breakthroughs, celebrity patient advocates, and conflicting religious beliefs have come together to bring the state of stem cell research—specifically embryonic stem cell research—into the political crosshairs. President Bush’s watershed policy statement allows federal funding for embryonic stem cell research but only on a limited number of stem cell lines. Millions of Americans could be affected by the continuing political debate among policymakers and the public.

**Stem Cells and the Future of Regenerative Medicine** provides a deeper exploration of the biological, ethical, and funding questions prompted by the therapeutic potential of undifferentiated human cells. In terms accessible to lay readers, the book summarizes what we know about adult and embryonic stem cells and discusses how to go about the transition from mouse studies to research that has therapeutic implications for people.

Perhaps most important, **Stem Cells and the Future of Regenerative Medicine** also provides an overview of the moral and ethical problems that arise from the use of embryonic stem cells. This timely book compares the impact of public and private research funding and discusses approaches to appropriate research oversight.

Based on the insights of leading scientists, ethicists, and other authorities, the book offers authoritative recommendations regarding the use of existing stem cell lines versus new lines in research, the important role of the federal government in this field of research, and other fundamental issues.

**From reader reviews:**

**Linda Shell:**

Reading a book tends to be new life style on this era globalization. With looking at you can get a lot of information that can give you benefit in your life. With book everyone in this world may share their idea. Guides can also inspire a lot of people. A great deal of author can inspire their reader with their story or perhaps their experience. Not only situation that share in the books. But also they write about the ability about something that you need example. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that you can get now. The authors nowadays always try to improve their skill in writing, they also doing some analysis before they write on their book. One of them is this Stem Cells and the Future of Regenerative Medicine.

**Linda Henderson:**

Playing with family within a park, coming to see the sea world or hanging out with good friends is thing that usually you could have done when you have spare time, subsequently why you don't try matter that really opposite from that. 1 activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love Stem Cells and the Future of Regenerative Medicine, it is possible to enjoy both. It is fine combination right, you still wish to miss it? What kind of hang type is it? Oh occur its mind hangout fellas. What? Still don't understand it, oh come on its identified as reading friends.

**Major Talley:**

Is it an individual who having spare time then spend it whole day by means of watching television programs or just lying on the bed? Do you need something totally new? This Stem Cells and the Future of Regenerative Medicine can be the answer, oh how comes? The new book you know. You are therefore out of date, spending your spare time by reading in this new era is common not a nerd activity. So what these books have than the others?

**Sebrina Knapp:**

Don't be worry should you be afraid that this book can filled the space in your house, you may have it in e-book means, more simple and reachable. This Stem Cells and the Future of Regenerative Medicine can give you a lot of good friends because by you considering this one book you have matter that they don't and make you more like an interesting person. This particular book can be one of a step for you to get success. This publication offer you information that probably your friend doesn't realize, by knowing more than some other make you to be great folks. So , why hesitate? Let me have Stem Cells and the Future of Regenerative Medicine.
