Making Choices in Sexuality (with InfoTrac): Research and Applications Susan L. McCammon, David Knox, Caroline Schacht

Designed to help students make informed choices about this complex aspect of human behavior, this new book centers around the unique theme of choices -- how to make them and how to live with their impact. This briefer version text provides a comprehensive and affordable alternative to longer texts for the course -- without sacrificing depth and detail. The book helps readers broaden their understanding of sexuality by examining it from a variety of perspectives, including psychological, biological, sociological, feminist, historical, and cross-cultural. Without preaching or bias, the authors present cutting-edge information to ensure that students are knowledgeable about critical issues in sexuality. From the latest on HIV/AIDS and sexually-transmitted diseases to coverage of cultural variations in human sexuality, this book is unequalled in its presentation of scholarly -- yet engaging -- subject matter. To demonstrate how the content applies to students, research-based inventories ("Self Assessments") taken from sexuality and health literature provide scales students can use to assess their own beliefs, attitudes, and behaviors.
