A short history of colonialism Wolfgang Reinhard

This well-written and comprehensive book by an outstanding expert provides students of history and the general reader with reliable up-to-date information on an essential part of the history of mankind: the global impact of European colonial expansion from the late Middle Ages to the present. It deals with the discoveries, with Portuguese, Dutch and English trade systems in Asia, with the Spanish, Portuguese, Dutch, French and British Colonies in America, the American plantation economy and the trade in African slaves, with settler colonies in the southern hemisphere, with US-, Russian and Chinese continental imperialism, with western colonial rule in Asia and Africa and the several waves of decolonisation between 1775 and 1989. Twenty-four maps illustrate the narrative.

A useful teaching text, it combines traditional and more recent perspectives to produce a final balance sheet of Western colonialism and its global heritage. A carefully selected bibliography encourages further reading.
