CHICKEN RAISING MADE EASY Paul Chapman

Raising chickens to supply home-food needs embraces two major projects:

(1) brooding young chickens for broilers and fryers, and (2) maintaining a flock of pullets or hens for eggs and meat. These are separate enterprises; one or both may be included in the production program of an individual. These projects have been developed fully. In both, every job involved and every decision which must be made are presented in the sequence in which they will be encountered by the producer.

Facts concerning production and maintenance costs as revealed by the records of thousands of typical poultrymen are given. From these summaries any prospective producer may determine in advance what investment is required and what operating expenses will be involved for a flock of any size. Details concerning brooders and laying-house requirements are included with directions for selecting and building such equipment. House plans for laying flocks varying in size from 4 to 24 hens have been chosen from hundreds recommended by poultry departments of state agricultural colleges. Emphasis is placed upon keeping the flock in a healthy condition; directions for controlling parasites and diseases are specific. Helpful how-to-do drawings illustrate every technical problem incident to poultry production on a small scale. For beginners as well as those with some experience, it is hoped that this book will answer all vital questions concerned with producing chickens and eggs for home use.
